## COMBINATION STANDS

DIE **NEUE** GENERATION  
THE **NEW** GENERATION

**KOLBERG**  
G E R M A N Y

Ishii: Thirteen drums  
Concert Junior,  
Copenhagen setup

Die jüngste Generation des bewährten Kombiständersystems von Kolberg bringt einige Neuentwicklungen mit, die sowohl die Handhabbarkeit verbessern als auch das Einsatzspektrum vergrößern. Neben dem Sinfonieorchesterbereich werden nun auch die Anforderungen von Multi-perkussionisten optimal bedient. Die wichtigsten Neuheiten sind das flexible **Vario-Rack**-Wagensystem, die Prismenklemmung und die offenen Varianten der Stellringe und Hakenadapter.

**Alle neuen Komponenten sind mit sämtlichen bisher verwendeten Kombiständerteilen voll kompatibel.**

The latest generation of the approved Kolberg combination stand system introduces some novelties for further ease of handling as well as for broadening the array of use. Apart from the requirements of an orchestra musician now also the needs of the multi-percussionist are catered for.

The most obvious innovation is the flexible **Vario Rack System**. Other novelties are the prism clamping and open variants of clamps and fixtures.

**All new components are fully compatible with any existing Kolberg combination stand parts.**

# VARIO RACK VR1

Neben dem bisherigen Wagenständer mit festgelegten Lochabständen gibt es das neue **Vario-Rack-System** als Alternative. Nun sind sämtliche Teile des Wagenständers frei und flexibel montierbar: die Haupt- und die Querachsen, Rollen und vertikale Trägerrohre. Der gesamte Grundaufbau besteht aus Einzelteilen. Abstände können frei gewählt werden, die Rollen präzise dort platziert werden, wo sie am sinnvollsten sind oder wo sie am wenigsten stören. Gerade in Spielsituationen mit knappem Raumangebot ist dies eine enorme Verbesserung.

Besides the established mobile stands with fixed spacing we now offer the new **Vario Rack System** as an alternative. Here all parts of the structure are freely mountable without any restriction: the main tubes, horizontal tubes, casters and vertical tubes. The entire structure consists of separate components. It is possible to adjust any spacing *ad libitum*. Even the casters may be placed wherever they fit best or interfere at least. You'll certainly cherish the new freedom with the latest generation of the Kolberg combination stand!
